HAIR EXTENSION AFTERCARE

HANDS OFF

Resist the urge to touch, pull, or fidget with your extensions. This can loosen attachment points and create tension on your scalp.

BRUSH DAILY

Keep your extensions happy and detangled by brushing 2-3 times daily with your extension safe brush.

PRE-DIP RINSE

Avoid wetting your hair with chlorinated and salt water, always rinse your hair with clean water before swimming.

WASH UP

Reduce washing frequency to 1-2x a week. Be sure to cleanse the scalp well and always use high moisture products as recommended by your stylist.

SLEEP RIGHT

Always make sure your hair is completely dry before bed. Use a silk or satin pillowcase or cap to prevent tangling.

STAY HYDRATED

Extension hair gets thirsty! Deep condition your extensions regularly, use an oil from mid-shaft to ends daily after detangling, and use only alcohol and sulphate free products.

KEEP IT COOL

Keep heat styling to a minimum, and always use a heat protectant and the lowest heat setting to prevent damage.

MOVING ON UP

To keep your extensions looking fresh and your natural hair healthy, schedule your move ups as instructed.

COME CLEAN

Make sure to arrive for your move up appointments on time, with clean, dry, detangled hair.
